

SPUTNIC wants to:

- *Raise awareness about the beneficial impact of the (pedagogically sound) implementation of new educational technologies that enhance international networking and collaboration for an institution, its staff and its students.*
- *Spread know-how in those educational technologies from successful Minerva and other Socrates projects and providing a theoretical background as well as practical models and hands-on experience.*
- *Stimulate teaching staff to engage in initiatives on international mobility and international cooperation.*

SPUTNIC is a one-year project supported by the European Commission under the Socrates, Accompanying Measures Programme.

January 2007 to December 2007.

**Seminars
Promoting the
Use of
Technologies for
Networking and
International
Collaboration**
